Public Tender for Establishment of Superficies on National Non-public Use Land for Designated Industries (Long-term Care Services) Resumes, with Relaxed Bidding Qualifications

To facilitate the central government's policy initiatives and create opportunities for land development and revitalization, the Ministry of Finance amended the "Operation Directions for Establishment of Superficies on National Non-public Use Land" in 2024 and 2025. The amendments introduced procedures for establishing superficies through public tenders for designated industries, prioritizing the long-term care sector, and relaxed bidding qualifications for such tenders where the base price of the superficies fee is set at 20% to 70% of the land's market value. These measures aim to support the implementation of national policies. In line with the revised regulations, the tender documents for establishing superficies for designated industries (long-term care) have been adjusted to expand eligibility. Corporations, foundations, and juridical associations with teams qualified to operate long-term care institutions are now eligible to bid. The base price of the superficies fee remains set at 20% to 70% of the land's market value, encouraging cross-sector collaboration and enhancing private sector participation.

Interagency Collaboration to Streamline the Delivery Process for National Land Outside Central Government-Managed River Areas, and to Enhance Land Management Efficiency

To unify the administrative authority and clarify responsibilities for managing national land within central government-managed river areas (hereinafter referred to as "river areas"), the National Property Administration (NPA) and the Water Resources Agency (WRA) of the Ministry of Economic Affairs held director-level meetings on July 6, 2023, and December 30, 2024, and reached a consensus to collaborate. Both agencies are working together to simplify procedures and expedite the delivery and take over of national non-public use land within river areas currently administered by the NPA, and national public-use land outside river areas administered by the WRA's River Management Offices (hereinafter referred to as "river offices"). Following the takeover, each agency will be able to exercise its authority under relevant regulations, such as removing illegal occupiers, initiating legal proceedings, handling applications for lawful use by the public, as well as meeting temporary or urgent public service needs by government agencies. This collaborative effort is expected to significantly improve the utilization and administrative efficiency of national land.
